512-785-9254

Round Rock, TX 78664

## SUMMARY

A motivated individual with a passion for JavaScript, React, Node, and all things coding, seeking a position in a growth-oriented company where I can use my skills to the advantage of the company while having the scope to develop my own skills.

## SKILLS

- JavaScript
- React
- EJS
- React Native
- MongoDB
- Node
- Express
- GitHub
- CSS
- HTML
- Bootstrap
- JSON

## EDUCATION

**NUCAMP Coding Bootcamp**  
Austin TX • 08/2021

***Mern Stack And Mobile Development Graduate:***

MERN Stack And React Native

- JavaScript
- React
- Bootstrap
- Node
- Express
- MongoDB

## WORK HISTORY

**OSM LAB - Open Source Contributor**

*07/2022 - Current*

- Successfully executed multiple pull requests
- Resolved Issues on Github
- Screened and Updated JSON files
- Collected data about relevant companies
- Reported information to Wikidata.org to be used by OSM Lab
- Successfully added new brands to the database
- Collaborating with other developers to ensure quality contributions

**Stay-At-Home-Parent - Stay-At-Home Mom**

*09/2018 - Current*

Of all the work experiences I have had, THIS is where I have made the most growth in my character! While the duties of a Stay-at-home mom are numerous, here is a basic summary of my responsibilities:

- Child-Management and Cultivation which led to my daughter being inducted in the Talented and Gifted Program and Junior National Honors Society
- Meal Planning
- Cleaning
- Running Errands

- React Native

- Managing Finances

### **YODLE - Sales Representative**

*01/2012 - 10/2015*

- Consistently made between 80-100 Calls a day
- Engaged with customers to effectively build rapport and lasting relationships.
- Increased sales by offering advice on purchases and promoting additional products.
- Developed and delivered engaging sales presentations to convey product benefits.
- Attended advanced training sessions and conferences to increase product knowledge and productivity.
- CRM Management
- Salesforce
- Self-sourced leads
- Cold-calling

### **CAP STONE PROJECT- MANIFEST-TEN.VERCEL.APP**

- A simple full stack application, where users can upload and delete blog posts from my database, hosted on MongoDB.
- **Technologies used:** React, Node, Express, MongoDB, Heroku, and Vercel
- **What I Reviewed:** This project helped me to review fundamental concepts such as : Map Array method, React state functional components, dynamic programming, useState, and useEffect Hooks. Not only that, I reviewed making GET, DELETE, and PATCH requests to the server and connecting to the MongoDB database.
- **What I learned:** In the process of building this project, I learned new skills such as: useContext and useReducer hook and useNavigate. On the backend, I learned how to better organize my files by using the MVC approach. On top of that I learned how to create a design system and how to deploy my app to Heroku and Vercel
